

Selected Latin-American Literature for Wind Ensemble

Miguel Etchegoncelay

Foreword: this list is far of being exhaustive, it is rather continually being updated with new works or discoveries. The very significant, original works for wind ensemble/band are included. The transcriptions are a structural part of the Latin American band tradition; therefore, I have included a good deal of them. Many of these works are in print, others are just manuscripts. With a little research on the net, you might get acquainted with all of them. I also furnished some contacts (see below) just to get in touch with the actors on the field. They can for sure help you to find even more works, not listed here.

Don't hesitate to contact me if you have further questions. Enjoy yourself researching this music and why not programming something different and venture off the beaten path. Best, Miguel
